

SEP Training Session

Everything you need to run a 2-hour SEP training session for your team. Agents walk out knowing the money codes, recognizing triggers on calls, and understanding the compliance lines they cannot cross.

Session length: 2 hours

Audience: Licensed Medicare Advantage sales agents

Goal: Agents walk out knowing the money codes, recognizing triggers on calls, and understanding the compliance lines they cannot cross.

Before the Session

First time running this training?

Read through the entire guide once before the session. The exercises are designed to be fast-paced — you need to know the answers before the agents do. The drill scenarios (pages 5–6) are especially important to rehearse. If you hesitate, they will too.

Technology Setup Checklist

- ☐ Laptop connected to projector/TV (test it before agents arrive)
- ☐ Open The Certainty System in your browser with four tabs ready:
 - [/sep-check](#) — SEP verification tool (used during CSN demo)
 - [/sep](#) — Full SEP guide pages (reference during deep dives)
 - [/sep-compliance](#) — Compliance checklist (used during compliance section)
 - [/sep/quick-reference](#) — Money Codes reference (used during Hour 1 walkthrough)
- ☐ Test your audio if you plan to play any call recordings
- ☐ Confirm WiFi is working — the live demo requires an internet connection

Documents to Have Printed

- ☐ Money Codes quick-reference sheet — one per agent (this is their desk reference after training)
- ☐ Compliance cheat sheet — one per agent (their pre-submission checklist)
- ☐ Optional: SEP Training Guide PDFs for agents who want the full deep dive on all codes

Room Setup

- Place one printed Money Codes sheet and one compliance cheat sheet face-down at each seat
- Agents should be able to see the projected screen and their printed cheat sheets simultaneously
- Whiteboard or flip chart available for the “What Did They Say?” drill (to tally scores if you want to make it competitive)
- Keep it informal — this is not a lecture, it's pattern recognition training

Your Mindset Going In

This is not “here are 37 codes, memorize them.” This is “here are the 5-6 codes that make you money, and here's how to recognize them on a live call.”

If agents leave knowing CSN, LEC, MOV, INT/DEP, and the three compliance lines they can't cross — the session was a success. Everything else is bonus.

Foundation + The Money Codes

0:00 – 0:10 Why SEPs Matter

TALK

ON SCREEN

No screen needed for this section. Keep the projector on the Certainty System homepage or turn it off. You want all eyes on you for this opener.

FACILITATOR NOTE

Stand up for this. Don't sit behind a desk. Make eye contact around the room before you start speaking. This opening sets the tone for the entire session — if you deliver it with energy, the room will stay engaged. If you read it flat, you'll lose them.

Key message: AEP ends December 7th. From April 1st through October 14th, there is no open enrollment. If a beneficiary does not have a valid SEP, you cannot enroll them. Period. That means from April to October, your ability to make money depends entirely on whether you can identify SEPs on inbound calls.

SAY THIS

“SEP season is where the agents who know their stuff separate themselves from everyone else. Most agents sit around waiting for AEP. You're not going to be most agents. Last SEP season, agents who knew C-SNP alone were enrolling 5 to 10 beneficiaries a month while the average agent enrolled zero outside AEP. The difference is knowing what to listen for.”

FACILITATOR NOTE

Pause after the last line. Let it land. Then pick up the energy and pivot to the cheat sheets.

TRANSITION

“Let me show you the codes that actually matter. Flip over the Money Codes sheet in front of you.”

0:10 – 0:25 The Money Codes

WALK THROUGH THE CHEAT SHEET

ON SCREEN

Open The Certainty System to /sep/quick-reference and project it on screen. This mirrors the printed Money Codes sheet. Point to the screen as you walk through each code so agents can follow along on both their printed copy and the projected version.

FACILITATOR NOTE

Have agents look at their printed Money Codes sheet. Tell them to follow along — you are going to walk through each row in the “They Just Told You Something” table. For each code, do this exact sequence: (1) read the “What they said” column out loud in a conversational voice, as if you are a beneficiary on a call, (2) name the code, (3) state the enrollment window, (4) state the next step. Do not ad-lib or skip ahead.

Have agents look at their printed Money Codes sheet. Walk through each code in the “They Just Told You Something” table. For each one:

- Read the “What they said” column out loud (use a natural, conversational tone)
- Name the code
- State the window
- State the next step

Spend the most time on these four:

CSN — The #1 opportunity. 17 million eligible. Year-round. No ticking clock. The question that opens the door: “Do you have any ongoing health conditions like diabetes, heart failure, or COPD?”

LEC — Extremely common. People retiring, losing jobs, COBRA running out. Get the exact date of coverage loss.

INT/DEP — Medicaid population. INT = full Medicaid, enroll into D-SNP. DEP = any Medicaid/LIS, enroll into PDP. Both repeatable, any month.

MOV — People who moved. Verify address change with Social Security. Window: month before + month of + 2 after.

SAY THIS

“You don’t need to memorize 37 codes. You need to recognize what someone tells you on a call and match it to the right code. That’s it. The cheat sheet does the rest. Keep it on your desk. Keep it open on your screen. Use it on every single call.”

TRANSITION

“Now let’s see if you can actually do it. I’m going to read you some things a beneficiary might say, and you tell me the code. Ready?”

The Drill + CSN Deep Dive

0:25 – 0:40 “What Did They Say?” Drill

INTERACTIVE

ON SCREEN

Turn the projector off or switch to a blank screen. You don't want agents looking at a reference during this drill — the point is to build recall from what they just learned. They can keep their printed cheat sheets face-down.

This is the most important exercise in the session.

FACILITATOR NOTE

Timing matters here. Spend no more than 30 seconds per scenario. Read the prompt, wait 3-5 seconds for someone to call out the answer. If they hesitate, give the answer yourself and move on immediately. Do not lecture after each one — speed builds pattern recognition. If you slow down to explain every answer, the energy dies and agents stop engaging. Save detailed explanations for the ones they get wrong. For ones they get right, just say “Correct” or “Good” and read the next one.

Read each scenario below out loud in a conversational tone, as if you are a beneficiary on the phone. Agents call out the SEP code. If they get it wrong, give the correct answer with a one-sentence explanation and move on. If they get it right, move on. Keep the pace fast.

FACILITATOR NOTE

Optional: Write agent names on the whiteboard and tally correct answers to make it competitive. Agents respond well to a little friendly competition.

(Full scenarios on next page)

0:40 – 0:55 CSN Deep Dive

TALK + LIVE DEMO

ON SCREEN

Navigate to /sep-check on The Certainty System and project it on screen. This is a live tool agents will use on every call. Walk them through it step by step.

FACILITATOR NOTE

Reference the Money Codes cheat sheet — have agents look at the CSN row. Then look up at the screen as you demo the tool. You are connecting the printed reference to the live tool they will actually use.

Key points to cover:

- C-SNP is the single biggest enrollment opportunity outside AEP

- 17 million beneficiaries are eligible nationwide
- Available year-round — no expiring window
- Must enroll INTO a C-SNP (not standard MA/MAPD)
- Provider must attest to the diagnosis within 2 months of enrollment
- C-SNP to C-SNP for the same condition does NOT qualify — only a different condition

Live demo (do this step by step):

1. Type a ZIP code into the SEP Check tool on screen (use a local ZIP agents will recognize).
2. Show the C-SNP availability results. Point out the qualifying conditions listed.
3. Say: “This is how fast it is. ZIP code in, answer out. You will do this on every call where someone mentions a chronic condition. Bookmark this page right now on your work computer.”

The question every agent should ask on every call:

“Do you have any ongoing health conditions your doctor treats regularly — like diabetes, heart failure, or COPD?”

SAY THIS

“If you ask this question on every inbound call from April through October, you will find CSN enrollments that other agents completely miss. This is how you eat during SEP season. The agents who ask this question make money year-round. The agents who don't sit around waiting for AEP.”

TRANSITION

“We're going to take a 5-minute break. When we come back, we're going to cover the confusion points that trip up even experienced agents, and then the compliance rules that will end your career if you break them.”

0:55 – 1:00 Break

5-MINUTE BREAK

FACILITATOR NOTE

During the break, switch your projected screen to The Certainty System /sep/quick-reference page. This is what agents will see when they sit back down, reinforcing the codes they just learned.

EXERCISE

“What Did They Say?” Drill

Read each scenario out loud in a conversational tone. Agents call out the SEP code.

Pacing: 30 seconds max per scenario. Hesitation = give the answer and move on.

Scenario 1

“I was just diagnosed with diabetes last month.”

Answer: **CSN** (verify C-SNP in their county)

Scenario 2

“I retired from Ford two weeks ago and my benefits ended.”

Answer: **LEC** (month of loss + 2 months)

Scenario 3

“I just moved from Ohio to Florida.”

Answer: **MOV** (verify address change)

Scenario 4

“I’m on Medicaid.”

Answer: **INT** if full Medicaid, DEP if partial or LIS

Scenario 5

“My husband passed away and I was on his employer insurance.”

Answer: **LEC** (death of covered spouse)

Scenario 6

“I’m turning 65 next month.”

Answer: **IEP** (7-month window)

Scenario 7

“I have COPD and I’m on oxygen.”

Answer: **CSN** (chronic lung disorder)

Scenario 8

“I got a letter saying my plan is being discontinued.”

Answer: **EOC** (Dec 8 – end of Feb)

Scenario 9

"I'm in a skilled nursing facility recovering from hip surgery."

Answer: **OEP-I** (verify facility type)

Scenario 10

"My COBRA coverage just ran out."

Answer: **LEC** (COBRA expiration counts)

Scenario 11

"I lost my VA coverage."

Answer: **LCC** (not employer = LCC, not LEC)

Scenario 12

"I have heart failure and my doctor says I need a special plan."

Answer: **CSN** (heart failure is qualifying)

AFTER THE DRILL

"Notice how you didn't need to memorize anything. You just listened to what they said and matched it. That's exactly what happens on a real call. The cheat sheet is your safety net — but after doing this a few dozen times, you won't even need to look at it."

FACILITATOR NOTE

If agents struggled with specific scenarios, make a mental note. You can revisit those codes during the Confusion Killers section in Hour 2. If agents aced the drill, acknowledge it: "You picked that up fast. Now let's see how you handle the tricky ones."

Confusion Points + Compliance + Live Practice

1:00 – 1:15 Confusion Killers

QUIZ FORMAT

ON SCREEN

Open The Certainty System to /sep/quick-reference and project on screen. Scroll to the section that shows commonly confused code pairs. Agents should also reference the Confusion Killers section of their printed Money Codes cheat sheet.

FACILITATOR NOTE

This section is a quiz, not a lecture. Read each question, let agents answer, then give the correct answer with a one-sentence explanation of WHY. One sentence max. Do not turn this into a lecture — the explanations are there to anchor the answer, not to teach a class. If you spend more than 90 seconds on any single question, you are going too slow.

Have agents look at the Confusion Killers section of their cheat sheet. For each pair, ask the distinguishing question. Have agents answer. After each answer, briefly explain WHY in one sentence.

TRANSITION

“You know the money codes. Now let's see if you can handle the ones that trip people up. These are the pairs that agents confuse the most. Get these wrong and you submit the wrong SEP.”

Quiz Questions

Question 1

Beneficiary has Part A effective January 2024 and Part B effective May 2024. Same dates or different? What code?

Answer: **Different dates. ICEP**

Why: Different Part A/B effective dates mean ICEP, not IEP. This is the most common confusion point for new agents.

Question 2

Beneficiary says they're on Medicaid. They get full benefits — doctor visits, hospital, everything covered. INT or DEP?

Answer: **Full Medicaid. INT — enroll into D-SNP.**

Why: Full Medicaid = INT. They get dual-eligible benefits through a D-SNP plan. This is year-round, repeatable.

Question 3

Beneficiary says they get Extra Help with their prescriptions but doesn't have full Medicaid. INT or DEP?

Answer: **LIS only. DEP — enroll into PDP.**

Why: No full Medicaid means they don't qualify for INT. DEP covers LIS recipients. Also year-round, repeatable.

Question 4

Beneficiary moved from Texas to Arizona AND lost their employer coverage when they relocated. MOV or LEC?

Answer: **Both! Check for both SEPs.**

Why: Two life events = two possible SEPs. Always check for all applicable codes, not just the first one you find.

Question 5

Beneficiary lost their TRICARE coverage. LCC or LEC?

Answer: **Not employer. LCC**

Why: TRICARE is government/military, not employer-sponsored. Non-employer coverage loss = LCC.

Question 6

Beneficiary lost their employer insurance because they retired. LCC or LEC?

Answer: **Employer. LEC**

Why: Employer-sponsored coverage loss = LEC. Get the exact last day of coverage.

Question 7

Beneficiary dropped their Medigap Plan F last AEP to try Medicare Advantage for the first time. It's been 8 months. 12G or 12J?

Answer: **Had Medigap. 12G**

Why: Had Medigap before switching to MA = 12G trial right. Within 12 months they can switch back.

Timing + Compliance

1:15 – 1:30 “When Did That Happen?”

WALK THROUGH TIMING

ON SCREEN

Pull up /sep/quick-reference on The Certainty System and scroll to the timing section. Point to each category on screen as you walk through the three columns below. Agents should also reference their printed cheat sheet.

FACILITATOR NOTE

Reference the Money Codes cheat sheet — have agents find the timing section. Point to the projected screen and their printed sheet simultaneously. Walk through each column left to right: always open, ticking clock, calendar-bound. For ticking clock codes, emphasize that getting the exact date is non-negotiable.

Key message: Most SEPs have ticking clocks. The exact date of the triggering event determines whether the window is still open. This is why “When exactly did that happen?” is the most important question on every SEP call.

Walk through the three timing categories:

ALWAYS OPEN

- CSN — Year-round (condition + C-SNP available)
- INT — Any month, repeatable (full Medicaid)
- DEP — Any month, repeatable (any Medicaid/LIS)
- OEP-I — Unlimited while in qualifying facility
- CDC — Anytime (has other drug coverage)

TICKING CLOCK

- IEP — 7 months around 65th birthday
- LEC — Month of loss + 2 months
- MOV — Month before + month of + 2 after
- MCD — 3 months from status change
- LCC — 2 months from loss or notification

CALENDAR-BOUND

- 5ST — Dec 8 through Nov 30 (1x/yr)
- EOC — Dec 8 through end of Feb
- AEP — Oct 15 through Dec 7
- OEP — Jan 1 through Mar 31 (1 change)

SAY THIS

“If you can’t get the exact date, you can’t confirm the SEP. And if you can’t confirm the SEP, you can’t enroll. The date is everything.”

TRANSITION

“Now we need to talk about the things that will end your career. I’m not exaggerating. These are the three compliance lines you cannot cross.”

1:30 – 1:45 Three Things That Get You Fired

TALK — COMPLIANCE

ON SCREEN

Pull up /sep-compliance on The Certainty System and project it on screen. Tell agents to bookmark this page right now on their work computers — it is their pre-submission checklist for every SEP enrollment.

FACILITATOR NOTE

Change your tone here. Lower your voice slightly. Slow down. This is the most serious part of the training. No jokes, no lightening the mood. Make eye contact with specific agents as you deliver each red line. Reference the compliance cheat sheet — have agents look at the compliance section of their printed handout.

This is non-negotiable. No jokes, no lightening the mood. This is serious.

1

DST is NOT a standalone SEP.

A disaster does NOT create a new enrollment window. It only extends a window the beneficiary already had and missed because of the disaster. Never advertise it. Never bring it up. If a beneficiary mentions a disaster, ask: “Were you trying to make a plan change during the disaster and were unable to?” If not, DST does not apply. Carrier benchmark: ~15%. Exceed it and you get audited.

2

Never enroll Medicaid in a give-back plan.

Beneficiaries with Medicaid already have their Part B premium paid by the state. A give-back benefit — which reduces the Part B premium — has zero value for them. It creates compliance risk and wastes a plan benefit they can't use.

3

Always verify the election period with the beneficiary.

Before every submission, you must have a conversation — not a checkbox — confirming: What is the qualifying event? When did it happen? Does the beneficiary understand they are enrolling based on this event? Use the compliance checklist at /sep-compliance before every SEP submission. No exceptions.

Watched SEPs + Roleplay

5 Most-Watched SEPs and Benchmarks

Also mention these during the compliance section. If anyone on your team is heavy on these codes, have a conversation before compliance does.

ON SCREEN

Keep /sep-compliance projected on screen. Point to the benchmark section if it is visible, or reference the compliance cheat sheet.

SEP CODE	BENCHMARK
DST	~15%
MOV	~10%
LCC	~4%
ACC	~3%
PAP	~5%

SAY THIS

“Compliance is not optional. If you submit the wrong SEP, the enrollment gets rejected. If you do it repeatedly, you get suspended. If it looks intentional, you lose your contract. Use the compliance cheat sheet before every SEP enrollment. Use the /sep-compliance page on The Certainty System before every submission. No shortcuts.”

TRANSITION

“You know the codes, you know the confusion points, you know the compliance rules. Now let’s put it all together. I’m going to play the beneficiary, and you’re going to handle the call.”

Live Scenario Roleplay

1:45 – 1:55

Live Scenario Roleplay

YOU PLAY THE BENEFICIARY — PICK 2-3 AGENTS TO HANDLE THE CALL

ON SCREEN

Switch to /sep-check on The Certainty System. Leave it up so agents can reference it during the roleplay if needed — they will use this tool on real calls, so let them practice with it now.

FACILITATOR NOTE

How to run roleplay well: You are the beneficiary. Sit in a chair facing the agent, not standing at the front of the room. Use a conversational tone — not a reading-from-a-script tone. Make them work for the information. Don't volunteer the qualifying condition or date right away. Answer their questions naturally, the way a real caller would. If the agent asks a great question, give them the information. If they don't ask, don't offer it. Pick 2-3 different agents across the scenarios so more people get practice. After each roleplay, ask the group: "What did they do well? What did they miss?" Keep group feedback to 60 seconds max per scenario.

Scenario 1 — CSN

You're a 72-year-old woman. You mention you've been managing your diabetes for 15 years and take insulin. You called because your current plan copays are too high. You don't know what a C-SNP is. Don't mention diabetes unless they ask about health conditions.

What the agent should do: Ask about chronic conditions. Identify CSN. Ask for your ZIP code. Use /sep-check to verify C-SNP availability. Explain the tailored benefits of a C-SNP plan.

Scenario 2 — LEC + ICEP

You're a 67-year-old man. You just retired last month. Your employer coverage ended. You've had Part A since 65 but delayed Part B — it's activating now. If they ask when you retired, say "about three weeks ago." Make them push for the exact date.

What the agent should do: Identify LEC (employer loss) AND ICEP (Part B activating with different date from Part A). Get the exact coverage end date (not "about three weeks ago"). Mention the CMS-L564 and CMS-40B forms.

Scenario 3 — MOV

You're a 70-year-old who just moved from Michigan to Florida. Your current plan doesn't have doctors in Florida. You haven't updated your address with Social Security yet.

What the agent should do: Identify MOV. Ask when you moved. Discover you haven't updated your address with Social Security — this must happen first. Explain the timeline and next steps before enrollment can proceed.

After each roleplay: Ask the group "What did they do well? What did they miss?" Keep feedback to 60 seconds. Focus on one thing done well and one thing to improve.

Closing + After the Session

1:55 – 2:00 Wrap + Resources

HANDOUTS + SCREEN

ON SCREEN

Open The Certainty System to /sep and project on screen. This is the main SEP hub page with links to every resource. Walk agents through what they are seeing.

Hand out (if not already distributed):

- Money Codes quick-reference sheet (tell agents: “This goes on your desk or taped to your monitor”)
- Compliance cheat sheet (tell agents: “Check this before every SEP submission”)

Show these on screen and have agents bookmark each one:

/sep-check — “This is your SEP verification tool. Use it on every call. Bookmark it now.”

/sep — “Full guides for every SEP category if you want to go deeper on any code.”

/sep-compliance — “Pre-enrollment compliance checklist. Use it before every SEP submission. No exceptions.”

/sep/quick-reference — “Digital version of the Money Codes cheat sheet. Same content as your printed sheet, always up to date.”

CLOSING MESSAGE

“You now know the codes that make money during SEP season. You know the question that opens every CSN enrollment. You know the pairs that trip agents up. And you know the three lines that get you fired. Everything is on your cheat sheet and on The Certainty System. SEP season starts April 1st. Be ready.”

FACILITATOR NOTE

End on time. Do not run over. Agents remember the last thing that happens — if you end crisply and with energy, that is the impression they take with them. If you trail off or let it fizzle, the whole session feels less impactful.

After the Session

Same Day: Email All Agents These Links

Send a follow-up email within 2 hours of the session. Subject line: “SEP Training Resources — Bookmark These.” Include the following links:

- [/sep-check](#) — SEP verification tool (use on every call)

- [/sep](#) — Full SEP guides for all codes
- [/sep-compliance](#) — Pre-enrollment compliance checklist
- [/sep/quick-reference](#) — Money Codes quick-reference (digital version)

Week 1: First SEP Calls

Schedule a 15-minute team standup after agents have taken their first real SEP calls. Answer questions, share wins, address confusion. Ask specifically: “Has anyone identified a CSN opportunity yet?” If not, revisit the qualifying conditions list together.

Week 2: CSN Check-In

Ask each agent how many CSN enrollments they have identified. If the answer is zero, sit down one-on-one and review the qualifying conditions list. Ask them to tell you the CSN question from memory. If they cannot, have them write it on a sticky note for their monitor: “Do you have any ongoing health conditions your doctor treats regularly?”

Ongoing

- Distribute the SEP Training Guide PDF to agents who want the full deep dive on all 37 codes
- Keep the Money Codes cheat sheet updated if codes or windows change
- Monitor the team's SEP code usage — if anyone is heavy on DST, MOV, or ACC, have a conversation before compliance does
- Re-run the “What Did They Say?” drill monthly during SEP season (it takes 15 minutes and keeps pattern recognition sharp)

This guide was built by Mega Care Insurance, powered by The Certainty System. For questions or updates, contact the training team.
